

Quality bathroom maker
Sanitary Ware

ABOUT

Providing excellent products and services for our customers,
Which reflects our company's faith, based on quality and service.

Factory size 117,000 square meter, including production area 66,000 square meter,
warehouse area 20,000 square meter and rest of available area 31,000 square meter,
with over 230 employees.

The company is capable to manage design, research & develop, manufacture and sales.

At present day, we have a tunnel kiln and 2 intelligent shuttle kilns to reach 2,800 pieces daily output to satisfy supply clients
globally has services over 200 brands worldwide, annual turnover reach 12,000,000 USD,
we endeavor to escalate the quality of life for global consumers,
to offer an opportunity for consumers to create their ideal bathroom through the distributor we cooperate with.

TOILET FLUSHING SYSTEM

The patented flushing technology is adopted for the edgeless toilet to achieve good waste transportation with the lowest water consumption. It also replaces 100% of the intercepted water in each cycle to prevent bacterial growth. Not only the self-cleaning glaze technology is used on the glaze surface, but also our R&D engineers have designed the glass without flush edges; Therefore, no hidden and inaccessible places will lead to bacteria breeding and odor.

SUPER VORTEX SIPHON

The Super Vortex siphon flushing mode is specially developed for "Continuous Cycling". It removes dirt more easily, keeps interior surfaces clean, and saves a lot of water

360 JET SIPHON

The inner socket is 360° clothed, and a large amount of water flow from all directions strongly flushes the inner wall of the toilet, which makes it difficult for dirt to adhere

Nature and the Future

In a rapidly evolving world, we draw inspiration from the fluid lines of nature, blending them with the precision of modern technology to create product designs that embody natural aesthetics and anticipate future trends.

OY-1498

OY-1499

OY-4099

OY-5299

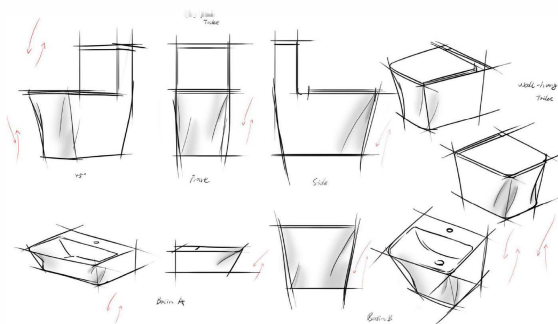

OY-6699

The series is distinguished by the dynamism of its forms, created by means of an act of torsion which makes the plasticity of the white ceramic an absolute protagonist. It is expressively treated like a block of Carrara marble and characterised by vibrant chiaroscuro effects.

Through these dynamic lines, we are not just designing products; we are shaping a lifestyle, enabling users to experience the seamless flow of nature and the convenience of technology in their everyday lives.

The rhythm of nature

Our design team delves into the lines and shapes found in nature from winding streams and undulating mountains to the elegant curves of plants drawing upon these natural masterpieces as sources of creativity.

One piece toilet Siphonic

Featuring modern aerodynamic design, our siphonic toilets utilize advanced siphon technology to ensure powerful flushing while reducing noise, providing an efficient and comfortable experience.
